

RE : PROFILES OF INTEGRATED **OIL & GAS BUSINESS** IN INDONESIA, 2008

The government is constantly trying to lure potential investors to invest their money in oil and gas explorations in Indonesia. Continued and sustainable explorations lead to more new oil and gas discoveries. The oil and gas industry in Indonesia is still attractive despite the decline in oil production in the last few years.

CIC as an independent consultant has launched the latest **DIRECTORY** containing about 1,100 natural oil and gas companies, manufacturers of the support equipment, construction companies, contractors and traders. The comprehensive Directory covers the oil business in Indonesia, ranging from exploration, exploitation, processing, to natural oil and gas trading support equipment and facilities.

Matters about these companies are specified and explained in great detail, covering their addresses, date of establishment, legal status, licenses, category, lines of business, production capacity, commencement of operations, capital, shareholders, employees, management boards, as well as other important information.

The first edition of the Directory is available at the CIC office at US\$ 350 per copy, and can also be ordered from the head of our marketing division Mr. Parlindungan Sihombing SE, phone numbers (021) 3101081,3147433; Fax (021)3101505, 3103488; email: marketing@cic.co.id or website <http://www.cic.co.id>.

Thank you for your interest and cooperation.

Best regards
