

SINCE THE LAST FEW DECADES, the market of paper products, printing inks and printing services and other related industries in Indonesia continues to grow in line with the increasingly rapid development of mass media industry, manufacturing industry and the advertising industry. Mass media industries like the newspaper industry, publishing magazines and books have experienced a significant increase in paper consumption per capita, although Indonesia is still below the main countries of ASEAN.

With the increasingly large market demand for all types of paper products, printing inks and printing services in Indonesia these days is the result of the increasing in industrial production activities of mass media, publishing and manufacturing.

Wrapping or packaging, whether it is paper-based, metal and plastic in addition to functioning as a present wrapping or packaging that protects the packaged product, also serves as an informative guide about the packaged product and the image of the company that produces it.

CIC as one of the leading independent consultants in Indonesia in terms of industrial research and company investigation is always trying to encourage the growth of the mass media industry through the presentation of industrial based studies that are comprehensive, accurate and reliable. At this moment, **CIC** has again successfully developed and completed as well as presenting the Indonesian Paper, Printing & Related Industries Directory, 2010 which contains as many as 953 companies with as many as 12 items of product index.

INDEX BY PRODUCTS

- Book
- Label Printing
- Magazines
- Newspapers
