Study on INDUSTRY AND MARKET OF PESTICIDE In Indonesia, 2009

AGRICULTURAL sector up until 2008 still became one of economics stand point in Indonesia beside processing industrial sector and commercial sector. As an agricultural country since a long time, it is precise that agricultural sector becomes economics' locomotive in the future. To be more competitive in agricultural sector growth, agro product media (saprostan) including pesticide ought to be easy to get with fair price. Farmer Amenity to get pesticide will happen if supply ability in the country also be well maintained and this condition will be possible if pesticide industry in the country continues to expand.

Although from demand side looks prospective, nevertheless there are some constraints that reduce the growth rate of pesticide consumption, for example the increasing price of pesticide's raw materials because parts of those are still being imported and also the increasing rate of production in fake pesticide.

The condition which shows the growing of pesticide inquiries in the country along with the problems which come with it draws attention of **PT CAPRICORN Indonesia Consult (PT CIC)** to conduct a study with title "**Study on INDUSTRY AND MARKET PESTICIDE In Indonesia, 2009**". This study is conducted to obtain a clear picture for investment prospect in industrial sector of pesticide.

This Study discusses in full the growth supply and demand from each type of pesticide , depicts the growth in needs of pesticide products according to its user type and its trend in the future as a consequence of displacements that have happened in user's industrial sector.
